

AFTERCARE OF YOUR TATTOO

1. For the first 3 days, do not wash area. Apply a topical antibiotic ointment (Bacitracin or Neosporin). Keep area covered with a loose non-stick gauze pad.
2. Stay out of sunlight and tanning booths until tattoo is healed (7 to 10 days)
3. Do not soak tattoo in tub, sauna, Jacuzzi or go swimming while your tattoo is healing. Avoid excess water contact in the shower.
4. Do not use alcohol, acetone, or exfoliating agents on the treated area for at least 6 weeks.
5. Do not rub or pick the treated area—loss of color and/or infection could occur.
6. Extreme sun and exposure over the years will fade the color. This can be minimized by using a strong sunscreen of at least SPF 30
